MDWG report

- QCDml 1.4 is still the current version

- This is a *Good Thing*
  - QCDml is being used
  - → XML schema is effective

- HPQCD request for HISQ action to be added
  - This has been completed
  - Process tool too long
    - CMM accepts responsibility and apologies to HPQCD

- No development of propagator
  - Should be community driven

- Metadata capture project (see later)

- ILDG paper published! (arXiv:0910.1692)
  - please cite (proper reference to follow)
