Planning for the next phase

How close a resource sharing do we aim at?

    A) open strategy

        e.g.   NERSC Gauge Connection

                CCS Lattice QCD Archive

        configs made available to everyone

    B) grid with full authentication

        e.g.,   UKQCD Grid

    C) something in between

Physics collaborations based on ILDG
